AciSolv

ACID DETERGENT CAGE WASH

- Versatile, low-foaming detergent specifically designed for the removal of inorganic residues and salts
- Effectively removes mineral scale, hard water deposits, animal residue, and dried soil
- Enhances cleaning and reduces rusting and corrosion
- Can be used in conjunction with AlkaGent® or other alkaline detergents to equalize residual pH
- Buffer system provides two modes of cleaning power
- Reduces bio-burden from depositing on equipment

For use in both automated cage washers and manual use on a variety of equipment within the life science, veterinary, and research industries.
