

## HydroFoamer/Sprayer Series

Hose end foamers and sprayers offer automatic dilution with convenient control of where and how solution is applied.

### Ease of use enhances product performance

Application of diluted solution with the HydroFoamer or HydroSprayer hose-end proportioners is easy. On and off functions are finger-tip controlled using a trigger on the spray nozzle. To rinse, the concentrate container is disconnected using an easy-to-operate quick coupler, which is designed to allow either a full width spray or powerful jet stream when rinsing. This range of control helps personnel put the solution only where it's wanted. Handles on larger containers increase the operator's control over application.

HydroFoamers and HydroSprayers eliminate the time and hassle of manually mixing concentrates, which not only increases labor productivity, but also increases concentrate performance because the solutions are consistently mixed as directed by the manufacturer. Since concentrates are mixed only as they're applied, they are fresh and will perform at peak power, and waste is minimized.

When the HydroFoamer and HydroSprayer are used in combination (see reverse), a total system is provided that allows cleaning, rinsing and sanitizing.

Models 383 & 481

### Other benefits

- ▲ built with Hydro's proven, reliable components — durability proven by years of use in the field
- ▲ non-electric, no installation required — just fill the concentrate container and connect the dispenser to a water source
- ▲ compact, easy to store
- ▲ increased productivity of employees
- ▲ enhanced safety (reduced exposure to concentrates)
- ▲ maximum cleaning product performance.

### Useful in a wide variety of applications

- ▲ restaurants
- ▲ food preparation areas
- ▲ supermarkets
- ▲ food processing plants
- ▲ animal care/research facilities
- ▲ penal institutions (shower areas)
- ▲ health care and educational facilities
- ▲ service stations
- ▲ paving contractors' facilities (asphalt release agents)

## HydroFoamer models

**Model 481**

Model	Capacity	Approximate Dilution Range	
		Max.*	Min.
481	96 ounces (2.8 litres)	128:1	12:1
483	48 ounces (1.4 litres)	128:1	12:1

The HydroFoamer's unique injection concept mixes the proper amount of concentrate with both air and water to produce a thick, rich foam for longer soak time.

\* **Leaner dilutions available — Contact Customer Service for Information.**

## HydroSprayer models

**Model 383**

Model	Capacity	Approximate Dilution Range	
		Max.*	Min.
381	96 ounces (2.8 litres)	128:1	16:1
383	48 ounces (1.4 litres)	128:1	16:1

HydroSprayers produce a fine mist spray suitable for application of no-rinse sanitizers or products used to cover relatively large areas.

## Foamer/Sprayer combination kits

**Model 787**

### Model Description

- 781 One model 481 and one model 381 as described above, with one trigger spray nozzle
- 783 One model 483 and one model 383 as described above, with one trigger spray nozzle
- 787 One model 481 and one model 383 as described above, with one trigger spray nozzle

## Options and accessories

- 131 Hose, 1/2" x 25', black
- 132 Hose, 1/2" x 25', white
- 137 Foamer end cap screen; aerates solution to produce a thicker foam
- 116 Container holding shelf, for storage of foamers/sprayers when not in use
- 10090836 Heavy duty foamer lid with metal quick-connects
- 10090837 Heavy duty sprayer lid with metal quick-connects
