

Surewash

YOUR PARTNER IN HAND HYGIENE TRAINING

A Cost-Effective Hand Hygiene Training System Teaching the WHO Technique

surewash

Advantages

SureWash shifts learning from the classroom setting to the hospital environment. Training and retraining is available 24 hours a day, 365 days a year, allowing users to practice, rest and repeat, building muscle memory for life. A study in Yale University using the SureWash system found that a single training session is not effective in ensuring the skill of hand hygiene is achieved. Rather, regular training over multiple days is necessary to reach proficiency. and hygiene competency.

Surewash Products

SureWash provides three products to suit your organizations needs for training staff, patients and visitors in hand hygiene technique. You can choose between the ELITE, the GO and the APP. All systems gamify the learning technique, making training fun, engaging and interactive. Hand hygiene compliance rates are thus increased when incorporated into a multi-modal approach, helping to reduce the risk of infections and improve patient outcomes.

System Benefits

Engaging, interactive training through gaming technology

Provides instant feedback

Develops muscle memory, which improves hand hygiene efficiency

Consistency in the standard of training received

Ease of deployment

In hospital training and retraining 24/7, 365 days a year

Reporting Suite

The SureWash Reporting Suite is an audited training record for regulatory bodies. It provides you with comprehensive, customizable views of your users training data.

It allows the C-Suite of an organization to:

- Access and easily track staff's training data to assess their standard in hand hygiene technique
- Identify the learning curve towards competency
- Automate and aggregate data across organisations
- Download and print reports in PDF or Excel format
